**JUGESH KUMAR SAHU** **R.D** Aurangabad, Bihar

Every Successful Galwian in Galway Business has the luxury to write their own story. When someone achieves new heights, their experiences are often inspiring and motivating. Such is the story of Jugesh Kumar Sahu, a remarkable Galwian who, through hard, Upline support, Training and determination, has become the "Distributor of the Month." In Galway, this title signifies moving from a life of poverty to one filled with success and prosperity. Dreams that once seemed impossible such as owning a beautiful home,

owning luxury cars and traveling the world, start becoming reality.

This perfectly fits Jugesh Kumar Sahu's life. Hailing from Aurangabad, Bihar, Jugesh has achieved a level of success through dedication and the right guidance from Galway Business that he never thought possible. Despite failing 10th class, he is now earning in the millions and inspiring many Galwians. Let's witness his story of struggle and success in his own words.

Jugesh, also known as J.K. Prasad Sahu, shares that his life was full of struggles. He had to stop studying after 8th class due to poor financial conditions and was forced to move to Himachal Pradesh for work, where he took a low-paying job in a pharmaceutical company. After a year, he returned home and resumed his studies in class 9. During this time, he received a bicycle from school, but financial problems led him to sell ice cream on that bicycle to support his family. He managed to finish 10th but did not pass.

Jugesh says, "If Galway Business hadn't come into my life, I would still be doing a low paying job or labor work. In our country, there are hardly any career options for someone who fails 10th. Luckily, my cousin introduced me to a golden opportunity that brought me success, recognition, respect, and confidence. Today, I am a successful businessman."

Jugesh explains, "Galway gave me a new life. I started Galway Business on December 16, 2011, and it was the turning point of my life."

Through Galway's training programs, he not only learned business skills but also transformed himself. Dreams that once seemed impossible began to come true. Galway taught him how to speak confidently and how to believe in his dreams. The boy who once sold ice cream on a bicycle is now the proud owner of two motorbikes and a luxury car and he even owns a splendid house in the city. All of this was made possible by the Galway Business, which does not discriminate based on education and provides equal opportunities for success.

Jugesh has now made Galway Business a family affair. His nephew is at the SD level, his elder brother at the PD level, and his cousin at the CD level. "This business is now not just a business for us but a family business, which is also my strength and secret to success." Jugesh dreams of taking his family on an international trip and providing high-quality education for his children in the city.

## Power to beat rejection

"When faced with rejection, I assured my family that I would become a successful Galwian one day. The more people doubted me, the harder I worked," says Jugesh, giving credit to his upline and Galway's training modules. Now, the same people who doubted him are inspired by his success. Jugesh motivates his team using the Triple R activities. He keeps his team active and motivated by promoting members, giving awards and organizing trips. Jugesh's life has also improved through the use of Galway products, with his home featuring a Galway

Dream Corner filled with their items. He believes the quality of Galway products is the business's biggest strength.

## Galway is a Guarantee for Success

Jugesh Kumar Sahu's story is not just for Galwians but for all distributors who want to change their lives. He has shown that with hard work and determination, any goal is achievable. Galway has not only brought him financial success but also a new identity in society. "Every day in Galway is a new beginning. The harder you work, the more success you'll achieve. This business offers all the tools you need business plans, training, upline support and countless success stories to inspire you. All you need to do is put in the effort in the right direction," he says.

Galway Business gave Jugesh the chance to achieve something in life, and now he is spreading this motivation to others.

Celebrate the Festival with  
Galway Rice Bran Oil  
**A Perfect Blend  
of Sweet and  
Savory  
Delights!**

As the festive season approaches, we all start thinking about delicious dishes. For us Indians, every festival is incomplete without special foods, whether it's Holi, Diwali, Eid, or Chhath. During these times, various traditional dishes are prepared, both savory and sweet. From salty snacks to sweet treats, from hosting parties to enjoying the festive spirit at home, preparations include a variety of dishes like thekua, mathri, namkeen khurma, dahi vada, chakli, gujiya, poori, paneer, chole bhature, namakpare, gulab jamun, paneer tikka, batata vada, and many more. But do you know the most essential ingredient for making all these dishes? It's the oil used for frying them.

The biggest problem is that the so-called pure oils sold in the market today are often adulterated, almost like poison. That's why many people fall ill during

festivals. But you don't need to worry because you have your favorite rice bran oil. With it, you can confidently make your favorite dishes and fully enjoy the festivals, whether it's savory snacks or sweets. With Galway's rice bran oil, your family will eat pure and healthy food, without a doubt.

### Celebrate festivity with Galway Rice Bran Oil

The World Health Organization (WHO) and the American Heart Association have recognized rice bran oil as healthier compared to other oils. Galway Rice Bran Oil is a nutritious oil made from rice bran, known for its unique taste and aroma. It is physically refined to maintain its quality. The oryzanol present in it helps manage cholesterol levels.

According to a study, using this oil can reduce

cholesterol by up to 42% and LDL cholesterol by 62%.  
Galway Rice Bran Oil

contains balanced fatty acids, natural antioxidants, and ferulic acid, which are essential for keeping us healthy. The natural antioxidants fight free radicals in the body and enhance the body's ability to combat various diseases. Additionally, it is effective in controlling cholesterol levels and reducing high blood pressure. Food cooked in this oil is highly beneficial for your health. It has a balanced fat profile with the right mix of PUFA/MUFA. Moreover, its high smoke point makes it ideal for frying dishes.

So, with Galway Rice Bran Oil, enjoy your festivals with peace of mind and ensure your family eats pure and healthy food.

## Earn Millions from Garlic Farming with Wonderful Products of Galway Krishnam

Garlic is a nutritious tuberous spice crop used as a seasoning in every Indian kitchen. Compared to other tuber vegetables, garlic is rich in nutritional properties, which is why it is known for its various health benefits. Besides its use as a spice, garlic has several medicinal qualities, making it not only a cash crop for farmers but also an important contributor to the country's economy. In India, garlic cultivation occurs in all states, but Madhya Pradesh is the leading state in terms of garlic production.

According to data from the National Horticulture Board, Madhya Pradesh alone accounts for 62.85 percent of the total garlic produced in the country. Together with Rajasthan and Uttar Pradesh, these three states contribute nearly 85 percent of India's total garlic production.

October is considered the ideal month for garlic cultivation, as the

weather starts to change and a slight chill is felt. Planting garlic during the cooler months results in better crop growth. By using Galwe Krishnam products, you can not only produce superior garlic crops but also earn significant profits.

In this article, we will discuss how you can achieve good garlic yields with the help of Galwe Krishnam products.

### Important Points to Know About Garlic Cultivation:

- October-November is the best time for garlic cultivation, after the rainy season.
- Use healthy and large-sized bulbs (cloves) and seeds for planting.
- Loamy soil rich in organic matter is best for cultivation.
- The pH of the soil should be 6.0-6.5.
- The soil should have good drainage.

For more information, please contact our Galway Krishnam Specialists via Phone WhatsApp Customer Care.

Ashutosh Singh  
7489653668

- Organic manure or compost should be mixed into the soil.
- Add 20 kg of nitrogen, 20 kg of phosphorus, and 20 kg of potash to the soil.
- Plant the cloves 15

centimeters apart in prepared beds.

- Cover the cloves or seeds with 2 centimeters of soil.

- For optimal development of garlic bulbs, irrigate every 10-15 days in winter and every 5-7 days in summer.

### Seed Quantity

For higher yields of garlic, 1.5 to 2

quintals of healthy cloves per acre are required. The diameter of the cloves should be 8-10 millimeters.

### Sowing Method

For sowing, maintain a row distance of 15 centimeters in the beds, ensuring that the pointed part of the cloves faces upwards. After planting, cover the cloves with a 2-centimeter thick layer of soil.

### Galwe Krishnam Products to Aid Plant Growth and Method of Use:

- Field Preparation: During field preparation, it's best to treat the soil. For soil treatment, mix 100 kg of well-decomposed cow dung/100 kg of vermicompost/ash/loose soil with 1 liter of G Bio Phosphate Advance and let the mixture sit in the shade for 24 hours. After 24 hours, mix it into the nursery.
- Seed Treatment: It's crucial to note that when treating seeds or cloves, it can be done in two ways: with water and without water.

Note: Seeds or cloves that are smaller than normal should be treated without water.

- Use of Fertilizers: Based on requirements, sprinkle single super phosphate along with 10 kg of G C Power and 4-8 kg of G Vam per acre.

- Irrigation Timing : After 20-25 days of planting, for irrigation, mix the required amount of urea + 10 kg of G C Power + 200 ml of G Amino + 200 ml of G Bio Humic and sprinkle it by hand per acre.

**Note: Spraying should be done either in the morning or evening; avoid spraying in direct sunlight or high temperatures. Spray as per the condition of the plants.**
